

Enterprise Operations & SOP Compliance Manual

Employee Leave Policy

Employees are entitled to 20 paid annual leave days per year. Emergency leave requests must be approved by the Operations Manager within 24 hours. Sick leave beyond 3 days requires a medical certificate.

Server Downtime Procedure

In the event of server downtime, IT administrators must notify all affected departments within 15 minutes. Backup servers should be activated immediately. Incident reports must be submitted within 2 hours.

Remote Work Policy

Employees may work remotely up to 3 days per week with manager approval. All remote staff must remain available on Microsoft Teams during working hours.

Emergency Response Protocol

During emergencies, staff should evacuate through designated exits and gather at Assembly Point A. Emergency coordinators must perform headcounts immediately.

Data Security Guidelines

Employees must change passwords every 90 days. Sharing credentials with unauthorized personnel is strictly prohibited.

Sample Questions for Testing the RAG System

Question Number	Question
1	What is the annual leave policy?
2	How many remote work days are allowed?
3	What should IT administrators do during server downtime?
4	When should incident reports be submitted?
5	What happens during emergencies?
6	How often should passwords be changed?
7	Who approves emergency leave requests?
8	What communication tool should remote staff use?
